

The Plasma Clean Xtract injects ions and ozone into ducted ventilation systems where it immediately acts on odours, grease and smoke.

Simple to install, with low maintenance and running costs, this versatile modular solution provides affordable and reliable odour control and grease reduction in one unit, making it the perfect partner for a wide range of ducted applications.

There are many benefits to using the Plasma Clean Xtract over conventional UV methods, including:

- Low capital and running costs
- Simple installation and maintenance
- Compact and lightweight
- Quiet operation
- Environmentally friendly

The **compact and lightweight units** have been designed for odour control especially in situations where space is at a premium, and can be used either alone or in combination with activated carbon or catalysis systems.

Xtract odours

- Affordable odour control
- Low maintenance
- Easy installation
- Low running costs
- Compact & lightweight
- Quiet operation
- Retrofit
- Environmentally friendly

Product Specification

Volume Flow rate	Up to 2m ³ /s per unit
Power consumption (W)	< 150
Power supply	230V / 1 ph / 50Hz
Size (mm) HXWXL	307X185X343
Weight (kg)	12
Safety	Circuit breaker 5 A Air flow proving switch installed Fan power supply interlock
Operation	Fully automatic

Plasma Clean. Odour Control. Simple.
